

jews 1933 - slaves - jews slave project

jews were used by nazi germany just like the natives of Africa from America.

Slave trade out of Africa, 1500-1900 about 10 million.

Slave workers in the German arms industry.

Nazi Germany had predicted and took care of the increase in births.

This is how it reached 80,000,000 in 1939.

The Wehrmacht was the unified armed forces of Nazi Germany from 1935 to 1945.

It consisted of the Heer (army), the Kriegsmarine (navy), and the Luftwaffe (air force).

During World War II, approximately 13.6 million soldiers served in the German Army.

In Nazi Germany, the Hitler Youth was established to physically train young people with Nazi ideology. At the onset of war, it had 8.8 million members, but this number

decreased significantly once the war began.

Consequently, "workers" had to be found. Human source ?. The Jews. Why ?. Assumptions:

- 1) Obedient. Passives. Their religion helped manipulate...
- 2) Geographically distributed everywhere.
- 3) Without state - seat of homeland.
- 4) Of moderate intelligence. Competent but not genius. Just efficient workers.

P.S. The State of Israel was founded on May 14, 1948. In 1939, the global Jewish population reached its historical peak of 17 million, constituting approximately 0.8% of the world's population.

In 1933, the Jewish population of Germany numbered about 525,000.

In 1933, approximately 9.5 million Jews lived in Europe, comprising 1.7% of the total European population. This number represented more than 60 percent of the world's Jewish population at that time, estimated at 15.3 million.

3,000,000 Jews lived in Poland. Well, the first goal was the invasion and occupation of Poland so that the "workers" could be transferred.

So an "excuse" had to be found.

As always, every "important decision" needs its "reasoning".

Beginning of World War I, dropping of the atomic bomb, Bombing of Dresden, greek 1920, genocides, vietnam war 1955-70, genocides ...

Familiar silly simplistic excuses. Antisemitism Jews in Mein Kampf.

The main ideological manifesto of the National Socialist party, in the era before World War II.

Anti-Semitism was the pretext for building the "jews slave project".

So it was chosen by economic interests (Wall Street Crash of 1929), a theatrical figure - Hitler - to deliver these messages.

In 1933, only one country corresponded to the concept of science=knowledge=industry.

The German countries (Germany-Austria-Hungary-Prussia).

From 1840 Germany was at its peak. He had the cream of the crop of scientists.

Technologically, it was far from the first.

It is impossible that they believed in the nonsense of Hitler and his staff.

They were just looking for revenge from WW I.

They knew they would lose. However, they knew that they would win in the long run. The coin has two sides.

- 1) For the cultivation of microbes we use a substrate for incubation.
- 2) Feed the substrate with nutrients.
- 3) Mice for laboratory animals.
